

Many good books on the creation/evolution controversy are available today. However, many of these books can be difficult to understand and even the simplest books develop complex arguments. This book is very different. It takes a fresh, easy to understand approach that begins by teaching the reader some basic science. The principles of creation are presented with a Biblical view that is supported by science. The principles of evolution are presented and addressed to show some pertinent serious flaws. As an added bonus, the authors present and discuss some common questions such as the age of the earth, fossils, early life on Mars, and dinosaurs. The book also contains an additional reading list with an appendix with over 100 creation-related scriptures from both the Old and New Testaments.

Florence: The Surrounding Countryside and the Chianti Region (Tci Guides), Pressure Cooker Cookbook - 50 Contemporary Pressure Cooker Recipes: Quick and Healthy Dinners for Any Occasion, Angel Financing in Asia Pacific: A Guidebook for Investors and Entrepreneurs, The Biggest Bear, Nightmares Edge (Echoes from the Edge), Awful Art (Knowledge), Mary (Windows onto the Faith series), The Misers Daughter. Routledge illustrated Edition, Flying Fur (Shifting Crossroads Book 22),
