Hes got problems: the cost of air is going up, his wife wants to sell herself to another corporation, and his colleagues are always trying to get him tossed into the lye vats. Â But when he discovers a woman stealing rainwater, he sees his chance to move up in the world, maybe even become an executive. He reports her, spinning a picture, not just of a thief, but of a seditionist and revolutionary, someone who believes in that long-dead institution called government. Â Then she vanishes Â Overcome with guilt, he tries to track her down. What he discovers is an underground movement every bit as seditious as the one he had imagined. Â But as he becomes enamored with their cause and with life outside his corporation, Charles must contend with a larger truth; in a world where everything is for sale and lies are more profitable than the truth, even a group of revolutionaries can have something to hide.
