

It is said that the sparkle from Canadian diamonds mimics the awesome and seductive radiance of the northern lights, and yet, until 1991, no one thought diamonds could even be found in Canada. No one except two geologists who went in search of diamonds and found them on the Lac de Gras Barren Grounds at Point Lake near Yellowknife in Canadas Arctic. The discovery by Chuck Fipke and his partner, Dr. Stu Blusson, caused great excitement in international diamond circles. Today, Canada is the worlds third-largest producer, by value, of rough stones. Why? In contrast to gems mined in Africa, Canadas stones are considered pure ice, and they are also clean--not tainted by bloodshed and war as they are in such parts of the world as Sierra Leone and Angola. The discovery of diamonds in Canadas Arctic is an amazing story of perseverance in the face of immense odds. And the story has a very happy ending.
